

BLUEcloud Analytics Now Available for EOS.Web

March 7th, 2018, LEHI, UT— SirsiDynix is happy to announce the release of BLUEcloud Analytics for EOS.Web. BLUEcloud Analytics helps libraries surface insights into how their library is being used so they can make educated, data-driven decisions. Fundamentally it empowers EOS.Web customers with the enterprise class tools of analytics, dashboards, charts, and the flexibility of striking, meaningful data visualizations showing their impact in their organization.

Available as a replacement to ReportWriter, BLUEcloud Analytics is a robust, intuitive analytics platform that creates powerful reporting for libraries. It provides instant access and live syncing to scores of standard data visualizations—each with a customizable list of fields providing limitless options for presenting an organization’s return on investment. It will make the reporting process for EOS.Web libraries more efficient, more creative, and easier than ever before.

“We are excited to present another BLUEcloud product to our EOS.Web libraries,” said Jeff Smith, Vice President of EOS.Web Client Services. “The way BLUEcloud Analytics lets you visualize the data is really amazing. It’s unlike anything else in the industry. We’re really looking forward to getting this in the hands of our customers, providing them with another tool to help demonstrate their value with data.”

“Our goal here at SirsiDynix is to help our libraries deliver BLUE, or the Best Library User Experience,” said SirsiDynix CEO Bill Davison, “with the updated staff interface, eResource Central, and now BLUEcloud Analytics available for EOS.Web, it is truly flourishing. We see this new tool for EOS.Web significantly enhancing special libraries’ ability to surface insights and show them to management.”

For more information on implementing BLUEcloud Analytics into your EOS.Web instance please contact [Jeff Smith](#).
