*Linked Media Video in SDSC  
VOTE for Enhancement#*

**83831**

A screenshot of the SirsiDynix Support Center website. At the top, it says "EOS International" in yellow and "Linked Media Overview" in white. Below that is a video player with a play button and a progress bar showing 21:28. The video content shows a globe with the text "EOS" and "Connecting People &amp; Information for Over 30 Years". Below the video is the "SirsiDynix® Support Center 2.0" logo and a navigation menu with items: Home, Products, Cases, Documents, Training, Community, Releases, Services, Account. The main content area shows the breadcrumb "Home &gt; Deleting Linked Media" and the title "Deleting Linked Media". There are two tabs: "View" and "Voting results". Below this is a "User Story" section with the following text: "As a(n): Admin User", "I want: the user be able to go to Maintenance &gt; Cataloging &gt; Media Links Files and Delete multiple files", and "So that: unlinked Media Files can be deleted to free up storage space". At the bottom, there is a paragraph: "There is currently no way for a user to see which uploaded Linked Media is actually actively linked to a record in EOS&gt; I would like to be able to view which media are not linked easily and delete them in order to free up storage space for additional linked media."

*Thank You!*
